RE: WASTE WATER TREATMENT TECHNOLOGIES

The National Environment Management Authority (NEMA) is in receipt of information on waste water technologies for your company.

The water quality section of the Authority has created an inventory of all waste water treatment technologies available locally. The inventory and their brochures are available at the water Quality Section. Note that the Authority does not approve wastewater treatment technologies but analyses the performance of the technologies through quarterly effluent reports submitted during the license application process as per the 3rd schedule of the water Quality Regulations of 2006.

We confirm that Afro Industrial Agencies Ltd waste water treatment technologies are listed in the above referred inventory. While NEMA has no objection to the application of the waste water technologies, the Authority advises clients to consult their environmental experts or engineers on the size, type and performance characteristics of the chosen technology. Furthermore you are required to comply with statutory requirements of other relevant government agencies.

We look forward to future collaboration in making our environment better.

ZEPHANIAH O. OUMA
